

### What is ARC?

A research study that aims to optimize equitable Access to Resources in the Community for primary care patients.

Patient recruitment for the ARC study

**ENDS DECEMBER 15, 2019!**

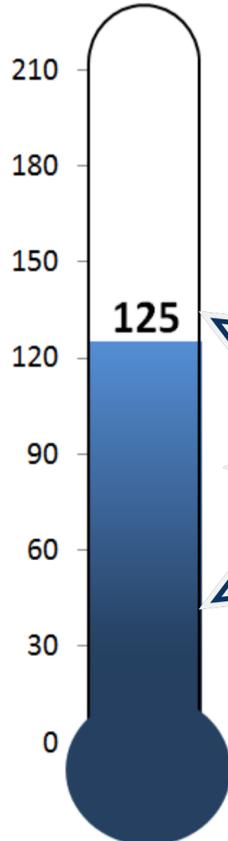

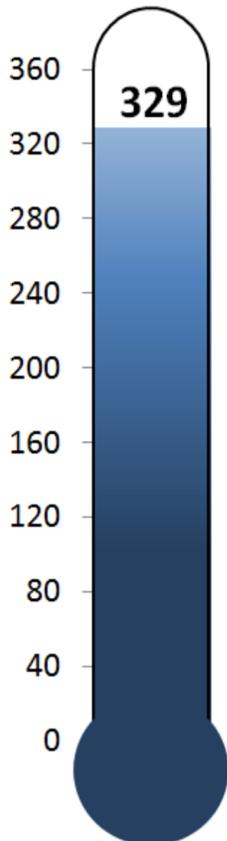

Referrals will be accepted until this day.

Number of referrals received to date

### Referral Goal

Ottawa

Sudbury

570 referrals will enable us to reach our target sample size

**Achieving our referral goal means your patients are more likely to access the services they need!**

## WE WANT TO HEAR FROM YOU!

The ARC research team is conducting INTERVIEWS with primary care providers to:

- (1) Learn more about **YOUR EXPERIENCE** in the study
- &
- (2) Help **IMPROVE** the ARC navigation program

What do we need to know to improve patient access to health-enabling resources?

One provider said: *"Patient needs are so unique that it's hard to know and remember all the available services. So of course having a patient navigator that could take charge and direct patients would be ideal."* [translated from French]

Would you like to share your reflections with us?

Talk to us in person OR by telephone
